Responsive web design (RWD) is an approach to web design that makes web pages render well on a variety of devices and window or screen sizes. Recent work also considers the viewer proximity as part of the viewing context as an extension for RWD. Content, design and performance are necessary across all devices to ensure usability and satisfaction. Designers have coveted print for its precision layouts, lamenting the varying user contexts on the web that compromise their designs. Ethan Marcotte advocates we shift our design thinking to appropriate these constraints: using fluid grids, flexible images, and media queries, he shows us how to embrace the “ebb and flow of things” with ...Gestaltung. Die Größe und Auflösung der Displays auf Laptops, Desktop-PCs, Tablets, Smartphones, E-Book-Readern und Fernsehgeräten können erheblich variieren. The Concept Of Responsive Web Design. Ethan Marcotte wrote an introductory article about the approach, Responsive Web Design, for A List Apart. It stems from the notion of responsive architectural design, whereby a room or space automatically adjusts to the number and flow of people within it:
